

We all are aware of the huge contribution of 384 SAR Squadron to Hellenic Air Force and society in general. A big variety of services like Emergency Medical Service, Delivery of Supplies to Isolated Areas, General Missions for the Common and Social Good and that is only a part of the daily life of 384 Squadron which never gets routine. For more information about the history of the squadron please visit the official Hellenic Air Force web-site [here](http://www.airforce.gr) .

Lately the services 384 SAR Squadron provides has got a night character where statistically the 70% of the missions are accomplished during night period of the day. That means that not only pilots but also the technical personnel maintain the Super Puma helicopters during night. For that reason a special patch has been designed and relized recently under the general title Nightwalkers that you can see above but also in our gallery [here](#) .

We would like to sincerely thank the Hellenic Air Force 384 Search and Rescue Squadron personnel and especially Cpt. John Stathis for the kind donation of the patch to airforce.gr web-site. We always appreciate, support and recognize that kind of genteel movements!
