

The training of ITAF pilots that took place in 120 Air Training Wing finished recently. The Italian pilots had the opportunity to finish their Basic Training with T-6 Texan aircrafts with 364 Air Training Squadron. The patch that created for that particular purpose is really beautiful. For more information about the co-training and photos from the ceremony of 19/03/2010 you can visit the HAF official web-site by clicking [here](#) .
