

[Skymax models](#) surprised us in a very positive way when announced the production of a rather rare and historical model presenting a Hellenic Air Force F-84G Thunderjet as used to fly with **337 Squadron "Fantasma"**

(Ghost). In October 1952 the 337 FB Sqn deployed from the Elefsis Air Base to the Larissa AB with F-84G aircraft in its inventory. What makes this model and especially 337 Squadron historical is the fact that at the beginning of the year 1953, the first acrobatic flight of the HAF was established and joined the 337 Fighter Bomber Squadron , a fact that projected the squadron in the inland as well as abroad. The establishment-training of the Acro Team had been accomplished.

Under famous 1/72 scale inside a beautiful box together with display stand the model can be presented with wheels down or up. Mostly a die-cast metal model with very little plastic offers a rare issue for model collectors and Hellenic Air Force admirers. For more information please visit <http://www.skymaxmodels.com>
