

This is the official book devoted to the A-7E/H Corsair II in Hellenic Air Force (HAF) Service. This is definitely not just a photo book since it contains a wealth of photographs in excellent printing quality (including a plethora of rare photos), from the HAF squadron archives, the Vought archive and numerous personal archives, as well.

The contents:

- PROLOGUE
- HISTORICAL DATA (Brief History - Main Types of A-7 Corsair II - Operational History - A-7 Corsair II users per type - History of A-7 in H.A.F. Service)
- HELLENIC AIR FORCE (HAF) CORSAIR SQUADRONS
- THE HELLENIC A-7s IN TIME (Photo Gallery)
- ANNIVERSARY AND "UNIQUE" AIRCRAFT
- THE HAF A-7 SERIAL NUMBERS
- FALLEN AIRMEN WITH A-7 CORSAIR.

Reading the titles of chapters we immediately understand that this book is a must for every aviation enthusiast especially for Hellenic Air Force fans. In its 120 pages and 350 photos the reader will read all information about service of A-7 in all countries but Greece as well. Major Apostolos Papadopoulos, the Commander of 336 Sqn was the chief editor himself something that proves the quality of this publication.

The digital setup was performed by HAF Appreciation Club "Icaros" www.sfpa-ikaros.gr and

Kostas Ntasios who have handled several Hellenic Air Force photo books. This is definitely their best not so much because of the artistic impression but mainly because of the completeness of reported information.
