Discover the mighty F-4E Phantom in this new unprecedented “Under The Skin” series book! The book covers the F-4E AUP in Hellenic Air Force service but will also become a valuable reference asset for any gun nosed Rhino.

Published by EagleAviation this book contains 108 pages and hundreds of photographs captured by one of the world’s leading aviation photographers illustrate in extreme detail every corner of the jet.

All the following are thoroughly described down the last detail:

- External details
- Walkaround
- Cockpits
- Engines and engine bays
- Access panels
- Fuel lines
- Landing gear
- Exhaust nozzles
- All the modern ordnance

“Phantom Under The Skin” is the must companion for all modelers and Phantom enthusiasts!

Take the challenge to build the ultimate scale Phantom or expand your knowledge around the McDonnel Douglas masterpiece discovering features around the jet that have never before published!
