

Three years after the publication of the first volume of the 'GREEKS IN FOREIGN COCKPITS' book, the second volume is out now by [Eagle Aviation](#) and available by [Discount Hobby Zone](#).

Inside its 520 pages (!), the lives and combat careers of seven more Greek parentage pilots, who fought over Europe, Mediterranean and China during the World War II, are presented. Among them is the top ranking Greek ace with sixteen victories, **John Agorastos Plagis**. His story, like the others, is supported by photos and testimonies not seen before in Greek and international aviation history publications. Along with the great ace from Lemnos island, there are chapters featuring

**Richard Demetriadi**

(Battle of France and Britain),

**Harry Zavakos**

,

**James Vurgaropoulos**

(both in combat over China), and

**Theodore Lambros**

,

**William Manos**

and at last but not least

**George Kouris**

(all in action over Normandy and NW Europe).

All chapters also include unpublished photos from the pilots' personal albums. Oil paintings, pencil sketches, digital paintings and colour profiles of the aircraft flown by the Greek parentage pilots and some of their opponents supplement the historical research. Once again, the extensive research by the writers has not only yielded fruit, it's exceeded their expectations. Maintaining the same format as [Volume A](#), and having a quality upgraded cover, the much larger [Volume B](#) (190 more pages) is impressive. The captions remain bilingual (greek & english language) and comprehensive to allow English-speaking readers to enjoy the photos and artistic depictions, as well as understanding the content of the book to a great extent.

- **Authors:** Demetrios Vassilopoulos, Kyriakos Paloulis, George Chalkiadopoulos
- **Pages:** 520 (A4 Format)
- **Photos:** 560 with bilingual captions

- **Profiles:** 42 profiles
- **Digital paintings:** 8
- **Paintings:** 5
- Missions and Victories Tables
