

We have the honor to be the first to review the new photo book dedicated to the Hellenic Air Force (HAF) Fighter Weapons School as published under the auspices of Panhellenic Association of Hellenic

Air Force's Friends

(eng: Interception)...

The photographs, authorship and general artistic provision are by **Mr. Savvas Savvaides** and as the general title gives away it is dedicated to the HAF Fighter Weapons School under Air Tactics Center based in Andravida A.B. The HAF Fighter Weapons School is the equivalent school of USAF Top Gun as most probably already know. That means that inside the 62 pages of this hardcovered book (ISBN: 978-960-446-198-1, size: 30x30cm) you shall find plenty of photos depicting aircrafts coming by all the active HAF fighter Squadrons.

Mr. Savvas Savvaides has selected 53 photographs out of 1,000 in total taken during two different visits of the Panhellenic Association of Hellenic Air Force's Friends

to the Air Tactics Center on November 2010 and November 2011 accordingly. The general goal is to introduce the HAF enthusiast, either experienced or not, into the every day life of HAF Fighter Weapons School. More than half of the photos, about the 2/3 of them, visualize the aircrafts and the emblem of the Squadron in service together with text in greek language providing information on the Squadron's role, weapons and history.

At the next pages of this fine photo book you will discover photographs of the trainers and trainees. Intensive scenes showing what comes before taking off and after landing during the exacting exercises under the program of HAF Fighter Weapons School. At last but not least you will find some great double sheet large size photographs of all kind of aircraft types.
